# Introducing Geneo X

Geneo X is a groundbreaking facial treatment system that triggers naturally beautifying processes within your skin. Based on the most natural and essential element—Oxygen.

Geneo X introduces established technologies into aesthetics clinics, offering the clinical benefits of 4 potent technologies—OxyGeneo, TriPollar RF, ESA, and Ultrasound. Each technology can be used separately to enjoy its specific activity or combined for a full synergetic effect.

Our treatments feature a variety of natural formulations with outstanding active ingredients for all skin needs.

The Geneo X provides immediate and long-lasting results—for every age, every skin type, every season. **We welcome you to fall in love with your skin again.**

A bubbled up  
experience  
for everyone

# This is Oxfoliation

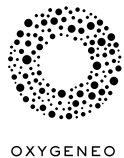

## Unlock your body's natural super-powers

OxyGeneo technology utilizes the physiological phenomenon called the Bohr Effect by means of our exclusively developed OxyPods.

CO<sub>2</sub> created during the treatment diverges the natural CO<sub>2</sub> balance on the skin, triggering the body

to react by increasing blood flow and delivering Oxygen from within to the area. This increased blood flow improves microcirculation, rebalances the CO<sub>2</sub>/Oxygen levels, and surges the skin with freshness and energy while infusing the skin with active ingredients.

The patented technology has a triple action that creates ideal conditions to transform skin from the inside out. Triggering the physiological processes responsible for increasing Oxygen levels in the skin, while simultaneously exfoliating the skin and preparing it for the absorption of active ingredients. All this magic occurs by using one of our uniquely formulated Geneo treatment kits, suitable to every skin type.

Red Algae  
Charcoal  
Vitamin C  
Hyaluronic Acid  
Green Tea  
Blue Spirulina

## A world of natural ingredients for glowing and healthy skin

The OxyPod is a capsule of potent active ingredients ready to be unleashed through groundbreaking patented technology. Activated by our unique Geneo Primer Gel, the OxyPod unlocks natural oxygenation from within, exfoliates and nourishes the skin. To enhance the skin's glow, conclude the treatment with the active ingredients of the Geneo Serum.

All our OxyPod formulations are based on naturally and fairly sourced active ingredients, maintaining them in a state that best preserves their potency and activity. The OxyPods and Serums are clinically tested and do not include artificial coloring or preservatives.

Our immersive treatment protocols include skin tightening and rejuvenating Tripollar RF and ESA technologies, continues with Ultrasound to rebalance the skin and finishes with a relaxing, sculpting Neo massage.

TRIPOLLAR RF

Triggering skin renewal by controlled heating of the dermis through safe delivery of RF energy and stimulating production of Collagen and Elastin fibers.

ESA

ESA (Electrical Skin Activation) is a unique proprietary technology targeting deep skin layers for activation of the natural healing mechanisms and re-activation of senescent (sleeping) skin cells. ESA is the first-ever technology to enhance skin elasticity through simultaneously by electrical impulses and RF energy.

ULTRASOUND

Improving blood flow and absorption of active ingredients by applying Ultrasound waves to the skin, creating vibration to increase permeability of the stratum corneum and improve skin nutrition

MASSAGE

Our massage treatment is designed to reduce redness and puffiness, while sculpting and encouraging the infusion of Geneo's beneficial active ingredients.

## Multi-Stimulation Treatments

Geneo treatments execute the methodology of multi-stimulation, working in synergy to trigger natural skin rejuvenating mechanisms and improve the skin's elasticity, appearance, and volume.

---

1

OXYGENEO

Stimulates cell renewal using the Bohr effect

---

2

TRIPOLLAR RF

Stimulates Collagen enhancement through volumetric heating

---

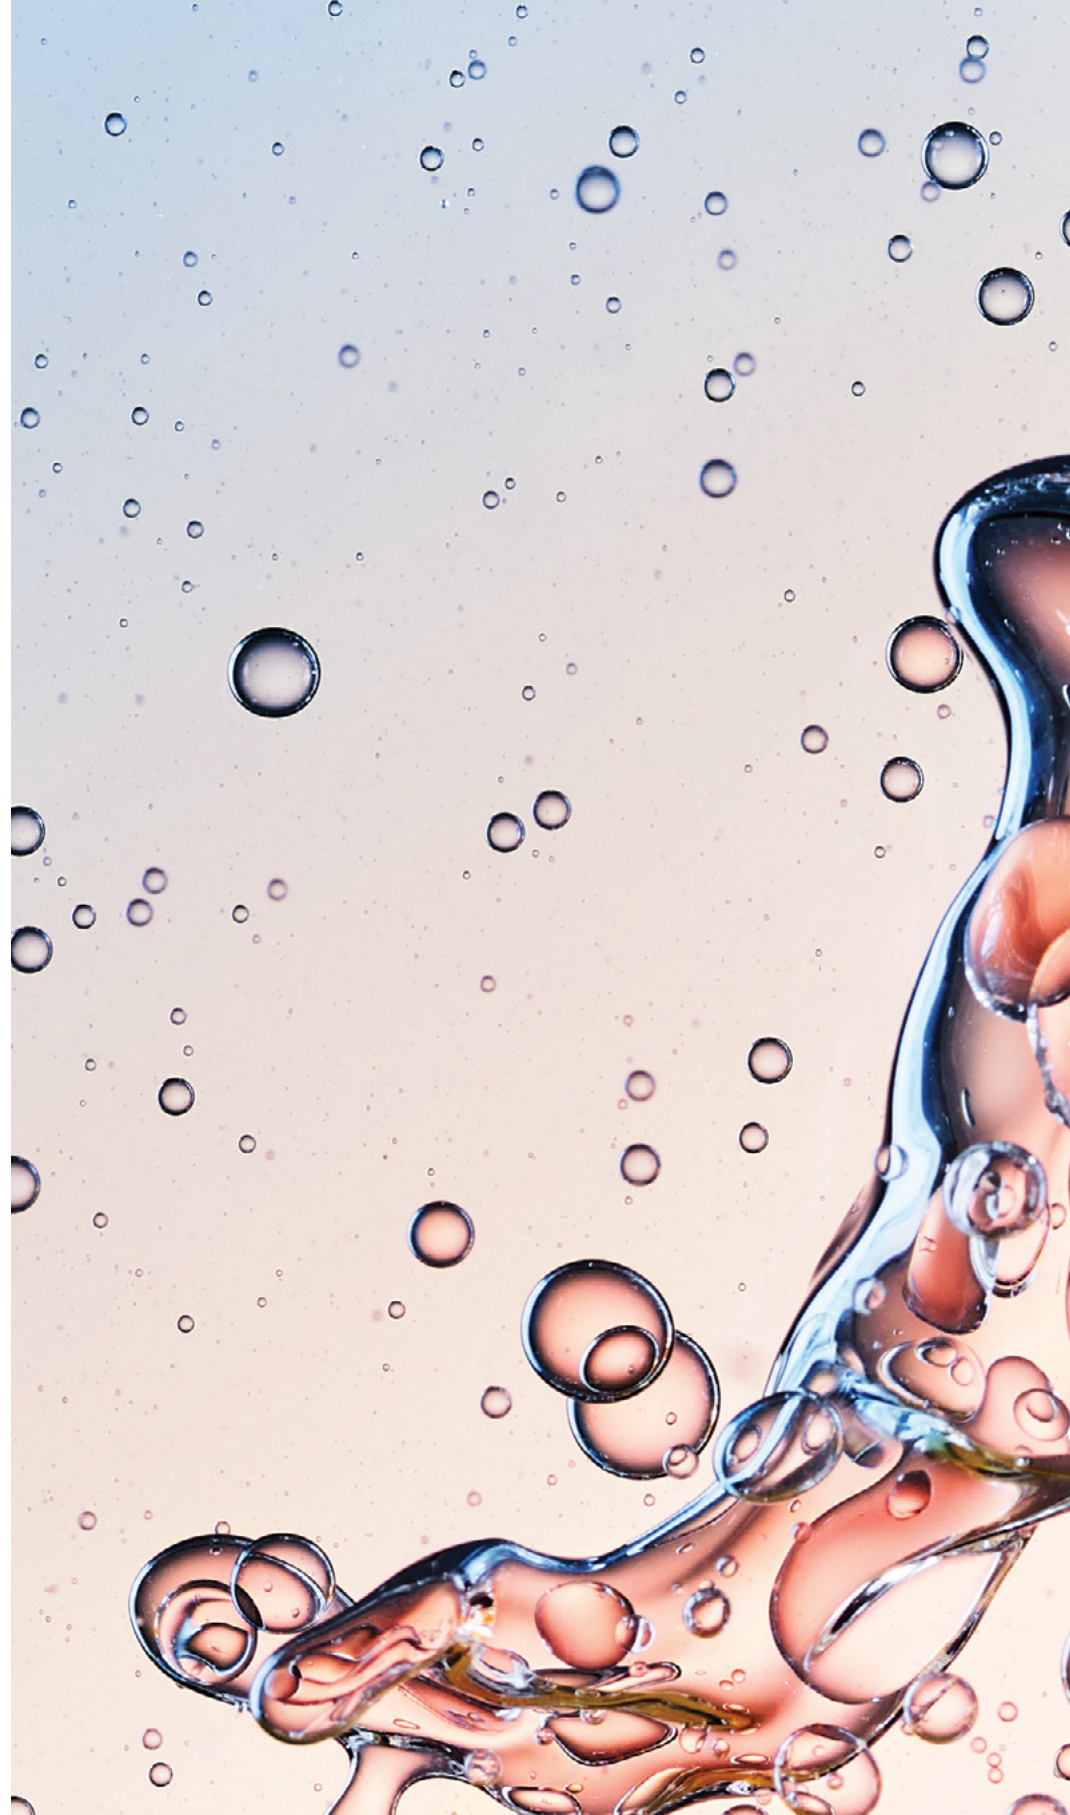

3

ESA

Stimulates fibroblasts through potential differences created by the electrical current
